PROFESSIONAL PROFILE

I have recently completed my Game Design Degree program from Fullsail University and I am currently seeking to work with a creative and driven team in the game development industry. I learn extremely quickly, am motivated and enjoy collaborating with others. I am enthusiastic, creative and passionate about my work and love crafting interactive experiences as well as sharing ideas and feedback to improve upon designs.

KEY SKILLS

· Organized and detail oriented.

· Strong communications skills, both verbal and written.

· Analytical and can quickly assess proper tools to resolve situations.

· Able to take feedback openly to iterate and improve work product.

Technical and Computer Skills

· Advanced knowledge of Microsoft Word and Microsoft Excel, including creating charts, worksheets, and reports with Vertical Lookup, conditional formatting and logical formulas.

· 3+ years' experience using C# with Unity 3D game engine to craft games using state machines, 2D tile-mapping systems, implementing sound, animating 3D characters, designing levels, developing game systems and game mechanics.

· Experienced with documenting, communicating and reporting system bugs

· Adept at communicating and updating Game Design Documentation for easy and organized workflow.

· Experienced with Perforce, version control software
